# Foreign Agricultural Trade of the United States

## FATUS

March/April 1992

## Sales Information

*Foreign Agricultural Trade of the United States* is available on a subscription basis. Subscription includes six bimonthly issues and two annual supplements. Subscription rates are \$25 domestic; \$31.25 foreign. Send check or money order payable to "ERS-NASS" to:

ERS-NASS  
P.O. Box 1608  
Rockville, MD 20850-1608

For faster service or more information, call **1-800-999-6779**, in the United States and Canada. Other areas, please call **1-301-725-7937**.

**Time to Renew?** See renewal information on the back cover.

Prepared by the Commodity and Trade Analysis Branch, Commodity Economics Division, Economic Research Service, U.S. Department of Agriculture. Principal coordinators are Thomas A. Warden and Mary L. Fant. Traci C. Curry provide word processing and table formatting support. Editorial support is furnished by Jim Carlin, Research Information Branch, Information Division, Economics Management Staff. Data processing support is provided by Sharlan Starr and William Meiller, International Economic Systems Branch, Data Services Center.

## Digest

**U.S. Agricultural Exports Up in 1992** (see p. 2). With nearly half of the fiscal year completed, exports were \$2.4 billion higher in 1992. During the first 5 months of FY 1992 (October 1991 to February 1992), U.S. agricultural exports rose 14 percent from a year earlier to \$18.9 billion. Exports were up largely because of increased wheat and soybean shipments, but high-value products (HVP) rose as well. Exports of corn, cotton, and tobacco were lower.

**Slight Rise in Imports** (see p. 6). U.S. agricultural imports rose slightly during the first 5 months of 1992, increasing 3 percent to \$9.8 billion. Imports were \$319 million higher during October 1991-February 1992 compared with a year earlier. Imports from Canada showed the largest increase, \$193 million higher, followed by Southeast Asia, \$147 million higher. Increases by commodity included fruit and preparations (including juices), \$147 million higher, and cocoa and products, \$112 million higher.

**Export Share of U.S. Agricultural Production Declining** (see p. 7). The exported share of U.S. production fell to an estimated 16 percent in FY 1991. This was the second consecutive decline for export's share of production, and, for the second consecutive year, falling bulk exports were the cause. For high-value products (HVP), the exported share of production in 1991 again rose to a record high. While the exported share of bulk products fell from 37 percent to 32 percent, the share for HVP rose from 8.6 percent to 9.2 percent.

**Rankings Change For Major Agricultural Exporters** (see p. 11). During the last half of the 1980's, the United Kingdom, Australia, Belgium, and Italy joined the United States, France, the Netherlands, and Germany in exporting more than \$10 billion in agricultural products per year. Although the United States remained the leading farm product exporter in 1990, its world market share declined over the past decade, while market shares of France, the Netherlands, and West Germany grew rapidly. Global export market shares for wheat, corn, and soybeans are examined.

## U.S. Agricultural Exports Up in 1992

With nearly half of the fiscal year completed, exports were \$2.4 billion higher in 1992. During the first 5 months of FY 1992 (October 1991-February 1992), U.S. agricultural exports rose 14 percent from a year earlier to \$18.9 billion. Exports climbed largely because of increased wheat and soybean exports, but exports of high-value products (HVP) rose as well. Exports of corn, cotton, and tobacco were lower.

U.S. soybean exports were the largest of any commodity during October-February, totaling \$2.4 billion, up \$710 million. Drought-reduced Brazilian production during 1991 helped the United States to increase its exports in 1992. FY 1992's October-February export volume was the strongest since 1988.

Wheat exports rose \$836 million, mainly because of increased exports to the former Soviet Union. Volume to all customers rose 6.7 million tons to 17 million tons. Exports to the former Soviet Union climbed 4.4 million tons and \$482 million. Soviet import needs during October-February were higher than during the same part of FY 1991, and more credit was also available. Concerns about Soviet repayment ability in 1991 crimped lending to the Soviets. Credit for purchasing U.S. agricultural commodities became available only after the Soviet Union was added to USDA's GSM-102 credit guarantee program. By the end of February 1992, nearly \$4 billion in U.S. credit guarantees and aid had been announced during FY 1991 and 1992. The impact of these announcements on U.S. exports to former republics of the Soviet Union was more pronounced after February 1991 than before.

In addition to credit availability, purchases by the former Soviet Union were driven by reduced agricultural production there. The 1991 Soviet grain crop is estimated to have

been 10 percent below its 1986-89 average. Output of vegetable oil in the first 9 months of 1991 was down 9 percent. During the same period, the socialized sector's meat (including poultry) and milk output were down about 10 percent, and egg output slipped 4 percent.

The former Soviet republics' buying emphasized wheat during the first half of FY 1992. In recent years, Soviet purchases from the United States generally emphasized corn. However, during FY 1991 (the entire 12 months), U.S. corn exports to the former Soviet Union fell from a record 16.4 million tons to 9.1 million tons. During the first 5 months of FY 1992, however, U.S. corn exports rose a bit, but by less than 750,000 tons despite a large decline in Soviet production. Consumption of corn and other coarse grains in the former Soviet Union is expected to fall nearly 20 million tons over all of 1991/92, largely due to lower feed supplies and reduced livestock numbers. Longrun U.S. exports could be affected if animal numbers decline in the former USSR.

U.S. corn exports dropped \$188 million and 2.6 million tons from a year earlier. The largest declines came in exports to Mexico, Egypt, Korea, and Eastern Europe. Mexico's and Eastern Europe's total imports fell, while Korea purchased a larger share of its imports from China this year.

The largest gain in corn exports, albeit relatively small, was provided by the Soviet Union. Exports were also higher to Taiwan, Jordan, and Iran. U.S. corn exports to Iran totaled 167,000 tons during the first 5 months of FY 1992, the first such shipments since 1981.

U.S. exports of agricultural HVP rose \$1.3 billion to \$10.1 billion. Gainers included vegetable oils (\$113 million), soybean meal (\$185 million), fruits, nuts, and vegetables (\$327 million), and animal products (\$334 million).

The biggest gains came in shipments to Mexico, Canada, the former Soviet Union, and the European Community. HVP exports to Mexico rose \$242 million, largely because of increased exports of animal products. Exports to Canada were \$238 million higher, with increases in animal products, nuts, and vegetables. HVP shipments to the former USSR were \$221 million higher, mostly due to increased shipments of soybean meal.

HVP exports to Japan increased by \$100 million to \$1.8 billion. As a result, Japan tied for second place with Canada in the ranking of U.S. markets for U.S. HVP exports. At \$2.1 billion, the EC remained the largest market for U.S. HVP exports. Mexico followed the EC, Canada, and Japan, accounting for \$1 billion in U.S. HVP exports. (Stephen MacDonald, Commodity and Trade Analysis Branch, 202-219-0822)

## EC is leading market for U.S. high-value products

## Slight Rise in Imports

U.S. agricultural imports rose 3 percent during the first 5 months of 1992 to \$9.8 billion. Imports were \$319 million higher during October 1991 to February 1992 compared with a year earlier. Imports from Canada showed the largest increase, up \$193 million, followed by Southeast Asia, up \$147 million. Commodities with the largest increases included fruit and preparations (including juices), \$147 million higher, and cocoa and products, \$112 million higher.

U.S. imports from several countries fell in 1992, however. Imports from Australia declined \$103 million, and imports from Mexico fell \$91 million. The United States reduced its imports of beef, sugar, wool, and macadamia nuts from Australia, and took less live cattle, coffee, and tomatoes from Mexico.

Imports from Canada increased, spanning a wide variety of goods, with the largest gain coming in live cattle, up \$87 million, more than offsetting reduced shipments of pork and live pigs. Canada boosted its shipments of sugar, tobacco, beverages, and grains, especially corn exports to the United States, which rose \$22 million. Canada also shipped large quantities of corn to the former USSR. Canada is not typically a corn exporter--more frequently importing significant quantities from the United States--but a particularly large crop in Ontario and Quebec led to large shipments during FY 1992.

U.S. agricultural imports from Canada have risen every year since 1975. Imports have risen at a 14-percent rate so far this fiscal year. Between FY 1976 and 1991, U.S. agricultural imports from Canada rose at an 11.5-percent annual rate. During FY 1991, though, imports from Canada rose only 4 percent from the year before.

A wide range of goods was also behind the increase in U.S. agricultural imports from

Southeast Asia in 1992. Cocoa and product imports rose the most, by \$50 million, followed closely by fruit preparations (including juice), up \$47 million. Other gainers included rubber, which the United States imports almost exclusively from Southeast Asia, and vegetables.

While Southeast Asia furnishes 20 percent of all U.S. cocoa imports, Africa delivers 23 percent. U.S. cocoa imports from Africa rose \$73 million during the first 5 months of FY 1992, accounting for most of the \$93-million increase in U.S. agricultural imports from Africa. Together, Africa and Southeast Asia accounted for most of the increase in U.S. imports of cocoa and products.

Imports of prepared fruits (excluding juice) rose \$58 million, with larger shipments from most countries. Widespread gains were led by Southeast Asia, Latin America, and Western Europe. Fruit juice imports rose largely because of increased shipments of apple juice. Apple juice imports climbed \$57 million, led by a \$24-million increase in shipments from Germany. Shipments were also higher from Chile (\$8 million higher), Belgium (\$6 million), and Turkey (\$6 million).

U.S. imports of grains and products rose \$66 million, with Canadian exports accounting for a \$41 million share of that. In addition to corn, U.S. imports of Canadian wheat, oats, barley, and some grain products were higher. Grain imports from Thailand rose \$11 million, accounting for much of the remaining increase. Rice accounted for just \$4 million, with feeds and fodders accounting for the rest.

U.S. pork imports fell \$102 million. Imports from Western Europe fell the most (\$38 million), followed by Canada and Eastern Europe (\$32 million each). (Stephen MacDonald, Commodity and Trade Analysis Branch, 202-219-0822).

## **Export Share of U.S. Agricultural Production Declining**

The exported share of U.S. production fell to an estimated 16 percent in FY 1991, the second consecutive decline for export's share of production, and, for the second consecutive year, falling bulk exports were the cause. For high-value products (HVP), the exported share of production in FY 1991 again rose to a record high. While the exported share of bulk products fell from 37 percent to 32 percent, the share for HVP rose from 8.6 percent to 9.2 percent.

Some of FY 1991's steepest export share declines came in sunflowerseeds, wheat, corn, and cotton. For each of these commodities, production rose and exports fell, but, for corn, falling exports had a much larger share of the responsibility for the decline. The exported share of U.S. corn production fell from 31 percent to 22 percent in 1991, the lowest in 4 years. The share for total agricultural exports also fell to its lowest in 4 years. Corn influences the total agricultural share more than any other commodity. In 1987, the exported share of production was 14 percent for both U.S. corn and total U.S. agriculture, the most recent low for each.

### **HVP's Were the Only Gainers**

Gains in export shares were confined to HVP exports. Beef and pork have shown particularly steady increases in their exported share of production in recent years, and the exported share of production of each nearly tripled between 1986 and 1991. However, at 4 percent and 1 percent, these shares still remain low. Other commodities showing an increased export share of production in FY 1991 included poultry meat, apples, and dried prunes.

The definition of HVP used here differs from what is commonly used elsewhere. Exports of processed grains and oilseeds are added to bulk products even though the presence of value-added processing means they are what is generally considered HVP. However, since

they are ultimately derived from bulk products their exports are added to bulk exports. A substantial portion of U.S. livestock production could also be described as a transformed bulk product, since animals consume grains and other feeds, but all livestock products here are considered HVP.

### **Corn Exports Drive Total Shipments**

Both agriculture and all bulk products suffered declines in their export shares of production. However, corn probably bore the most responsibility for the decline in total agriculture's share. Corn exports accounted for 34 percent of export volume and 13 percent of total agricultural export value in 1991. Between 1985 and 1991, corn's export share of production had the highest correlation (91 percent) with total U.S. agriculture's export share of production. (Correlation between two sets of data is their tendency to move together as they change from one year to the next. Specifically, if two sets of data differ from their respective means in a similar manner each year, they are highly correlated.) Corn's high correlation, in conjunction with its large share of total exports, implies that corn has accounted for much of the recent change in the exported share of U.S. agricultural production. The poor correlation for most other bulk products (cotton and soybeans, for example) is additional evidence of corn's domination of total agriculture's export share.

Sorghum had the second highest correlation at 90 percent. Pork had the third highest correlation at 78 percent, the highest of any HVP, and quite high given the low proportion of U.S. pork production that is exported.

Several bulk products showed fairly low correlation between their export shares and total agriculture's share. The soybean correlation was even slightly negative. Rice and tobacco shares showed essentially no correlation, and the cotton share showed only a 24-percent correlation. Wheat, at 75 percent, was the only other bulk export besides corn with a high correlation with total agriculture.

HVP exports are accounting for an increasing share of total U.S. agricultural export value and have generally accounted for more than half of the value of U.S. farm production. However, changes in the total U.S export share of production have largely depended on

changes in exports since 1968, and changes in exports have largely depended on changes in bulk exports. (Stephen MacDonald, Commodity and Trade Analysis Branch, 202-219-0822)

## **Rankings Change For Major Agricultural Exporters**

The top eight major agricultural exporters in 1990 (exporting more than \$10 billion) were the United States, France, the Netherlands, Germany, the United Kingdom, Australia, Belgium-Luxembourg, and Italy. Only the top four exporters, the United States, France, the Netherlands, and West Germany, have exported \$10 billion or more of agricultural products throughout the 1980's, while the other four have reached this level since 1987. Although the United States has remained the leading agricultural exporter, its world market share fell from 18.3 percent in 1980 to 12.2 percent in 1986, recovering to 13.9 percent in 1990. This decline corresponds with the rapid growth in market share since 1980 of three EC countries, France, the Netherlands, and West Germany. Their combined world market share had climbed from 19.3 percent in 1980 to 25.9 percent in 1990.

Despite comparative stability among the world's 10 leading agricultural exporters, supply and price changes for particular commodities and countries and sluggish world import demand caused shifts among the major exporters during the 1980's. For example, falling export values for coffee and soybean products caused Brazil to fall from fifth place in 1980 (behind the United Kingdom, Australia, Belgium-Luxembourg, and Italy) to 10th place in 1990. Declining values for grain and soybean exports also caused Argentina's drop in 1986-87 to 15th place from 11th place in 1980 and 1985.

The United Kingdom rose from seventh (behind Brazil and Australia) in 1980 to fifth in 1990, primarily on the strength of increased grain exports to EC countries. Lower values and volume of grain exports caused Canada's ranking to fluctuate during the 1980's and to decline from the seventh leading exporter of agricultural products in 1980 to ninth in 1990.

Although the United States maintained its position as the world's leading agricultural exporter during the past decade, it has yielded some of its dominant world market

share to EC countries (mainly France, the Netherlands, West Germany, the United Kingdom, Belgium-Luxembourg, Italy, Denmark, and Spain). The EC increased its combined market share from an average of 34.1 percent in 1980 to 44.5 percent in 1990. Only the United States outranked these countries individually as the largest agricultural exporter in 1990.

### **Market Shares of Major Exporters**

The United States increased its market share of world agricultural exports from 18.3 percent in 1980 to 18.6 percent in 1981-82, mostly because of increased export volume of grains and soybeans. The U.S. market share, however, fell to 16.8 percent in 1983-85 and to 12.4 percent in 1986-87, its lowest since 1970-72, because of falling export volume and prices of grains and soybeans. The U.S. market share rebounded to 14.2 percent during 1988-90. The combined market share of France, the Netherlands, and West Germany, the second, third, and fourth leading agricultural exporters, increased from 19.3 percent in 1980 to 25.9 percent in 1990. France, the world's second leading agricultural exporter, increased its market share from 7.9 percent in 1980 to 10.3 percent in 1990.

As a trading bloc, the EC was the world's largest agricultural exporter during 1988-90, with \$128.6 billion in exports. Excluding intra-EC trade, the EC was the second largest agricultural exporting region, with \$35.7 billion in exports in 1988-90. Agricultural export value and world market share for the EC increased between 1980 and 1990. For example, in 1980, EC agricultural export value was \$79.8 billion, representing 39.1 percent of world agricultural exports. In 1990, the EC agricultural export value was \$144.5 billion and accounted for 44.5 percent of world agricultural trade.

This increase in the value of EC exports was concentrated primarily in intra-EC trade. EC trade with non-EC countries climbed more modestly from \$27.3 billion in 1980 to \$39.1 billion in 1990. Because of the slow rate of

growth of the extra-EC trade, the market share increased from 11.7 percent in 1980 to 12.1 percent in 1990.

#### **Major Wheat and Wheat Flour Exporters**

The 12 leading exporters of wheat and wheat flour (in wheat equivalents) accounted for about 95 percent of world export volume for these commodities in 1980-90. The top five exporters, the United States, Canada, France, Australia, and Argentina, constituted 85 percent of the volume in 1980-85 and 79 percent in 1988-90. The United States shipped about 38 percent of the world export volume for wheat and wheat flour in 1980-84, but just 26 percent in 1985-86 when export volume fell to 26.3 million metric tons, down from 38.8 million metric tons in 1980-84. U.S. exports rebounded in 1988 to 42.3 million metric tons, 35.6 percent of the world market share. In 1989 and 1990, U.S. exports again declined, reaching only 28.7 million metric tons, 26.6 percent of world trade in wheat and wheat flour.

#### **Major Corn Exporters**

The 10 leading corn exporters in 1990 accounted for 97 percent of world corn export volume. The top six countries, the United States, France, China, Argentina, South Africa, and Thailand made up 96.1 percent of world corn export volume in 1990. These same countries accounted for 93.9 percent of the volume of corn exports in 1980. The top six exporters have undergone some changes since 1980. While the United States and France have consistently been the first and second leading corn exporters, the other four top exporters, China, Argentina, South Africa, and Thailand have exchanged places in their rankings during the past decade. The top five exporters changed in 1984 as drought in South Africa drastically cut production and exports during this period,

and China sharply increased its production and exports during 1984-87. Thailand replaced South Africa and China in 1983-85 as the fourth leading exporter. China surpassed South Africa and Thailand in 1985-90 and Argentina in 1987-90 to become the third leading corn exporter with shipments of 3.5 million metric tons.

The U.S. share of world corn exports was 78.5 percent in 1980, about 68 percent in 1981-85, and 47 percent in 1986. However, the volume of U.S. corn exports more than doubled during 1987-90, increasing from 27.1 million metric tons in 1986 to an average of 49.1 million metric tons in 1981-90 and to 52.2 million metric tons in 1990. This rapid growth in corn exports helped the United States to regain some of its dominant market share enjoyed in the early 1980's.

#### **Major Soybean Exporters**

The five leading soybean exporters, the United States, Argentina, Brazil, China, and Paraguay, accounted for nearly all world soybean exports in 1980-90. The United States shipped 81 percent of soybean export volume in 1980 and 86 percent in 1981-82. But, the U.S. share fell to 77.3 percent in 1986, to 68.6 percent in 1988, and to 59.4 percent in 1990. This decline in the U.S. share of world soybean exports has been associated with a rather constant world import demand and an expanding volume of exports by Brazil, Argentina, China, and Paraguay. Paraguay and China increased their world market shares of soybean exports from 1.1 percent in 1980 to 8.1 percent in 1989-90. Argentina's and Brazil's combined market share rose from 15.6 percent in 1980 to 23.6 percent in 1989-90. (Arthur B. Mackie, Agriculture and Trade Indicators Branch, Agriculture and Trade Analysis Division, 202-219-0705)

# INDEX OF APPENDIX TABLES

Table	Exports	Page
A-1	U.S. agricultural exports: Quantity and value by commodity . . . . .	A-2
A-2	U.S. agricultural exports: Quantity, value, and unit value by commodity and country, October-February 1990/91 and 1991/92, and February 1992 . . . . .	A-5
A-3	U.S. wheat exports: Quantity (1,000 MT) by destination, October-February 1990/91 and 1991/92 . . . . .	A-69
A-4	U.S. coarse grain exports: Quantity (1,000 MT) by destination, October-February 1990/91 and 1991/92 . . . . .	A-70
A-5	U.S. soybean exports: Quantity (1,000 MT) by destination, October-February 1990/91 and 1991/92 . . . . .	A-71
A-6	U.S. agricultural exports: Value (1,000 dol.) by destination, October-February 1990/91 and 1991/92 . . . . .	A-72
<b>Imports</b>		
B-1	U.S. agricultural imports: Value (1,000 dol.) by country of origin, October-February 1990/91 and 1991/92, and February 1991 and 1992 . . . . .	B-1
B-2	U.S. agricultural imports: Quantity and value by commodity . . . . .	B-2
B-3	U.S. agricultural imports: Quantity, value, and unit value by commodity and country, October-February 1990/91 and 1991/92, and February 1992 . . . . .	B-5
<b>Prices</b>		
C-1	Foreign currency units per U.S. dollar . . . . .	C-1
C-2	Domestic and foreign wheat prices . . . . .	C-2
C-3	Corn, sorghum, rice, and cotton prices . . . . .	C-2
C-4	U.S. and northern European soybean and product prices . . . . .	C-3
C-5	U.S. import prices . . . . .	C-3

Appendix table A-1--U.S. agricultural exports: Quantity and value by commodity
